Sherbrooke's Exquisite Irises

IRIS KAEMPFERI (Japanese Iris)

Propagated from original importations from Yokohama Nursery Co.'s
finest productions.

While it is true that Japanese Irises attain their highest state of perfection in low sour soil, do not be discouraged if you have no such location, neither have I. My gardens are all on upland and I get splendid growth and huge size by fertilizing with stable manure and by keeping up the moisture.

They require sun but absolutely no lime or bone meal. Divide and transplant as the clumps become congested.

The attempt to simplify the Japanese names has resulted in much confusion and I shall continue to list them by number as well as their original names, where known.

Prices are for liberal two-fan divisions (plus sales tax 2%) sent
post-paid on orders of \$2.00 and over.

No. 2—Yedo-Jiman.	Very large indigo blue, 3 petals. Superb.....	\$.50
No. 3—Kumo-no-obi.	Sky-blue veined pink lavender..... 6 petals	.35

SIBERIAN IRISES

Perry's Blue. A most popular sky blue, tall and stately.

Snow Queen. Pure white with deep yellow in throat.

Price 15c to 35c per division or clump.

IRIS GERMANICA

I expect to discontinue this class of Irises. I have many beautiful high class varieties which I will sell for 5c and 15c each, depending on quantity and variety wanted. The 5c rate will be for my selection, un-labeled.
